

**Amendments to the Drawings**

**Fig. 7** is amended to provide a missing Block 705, which is referenced in the specification as originally filed on p. 32, lines 10 - 11. Previously-numbered Blocks 705 - 740 are now renumbered as Blocks 710 - 745. These new block numbers correspond to the text of the specification as originally filed. In addition, the text of Block 715 is amended to change "Creates" to "Create".

The amendment to **Fig. 10A** replaces "Machine" with "Group" in Blocks 1030, 1035, 1040, 1046, and 1047. This change corresponds to the change made herein to p. 39, line 11 of the specification, and brings the text and **Fig. 10A** into alignment with the text on p. 33, lines 9 - 12, where it is stated that component objects, also referred to as instances of ProductModel, are stored in a Group object. (The text on p. 39, line 11 refers to obtaining component objects, and they are stored in a Group object, not in a Machine object.)

The amendment to **Fig. 10B** replaces reference number 1090 in the "Server" column (i.e., left-hand side) of the figure with reference number 1085. This correction aligns the figure with its corresponding text on p. 41, line 11, and removes an obvious error (in that reference number 1090 was used for two different blocks of **Fig. 10B**).
